

### **Immunization Policy:**

It is a state law and university policy that all entering students provide proof of two vaccinations for both measles and rubella (or MMR) prior to registration. It is recommended that the student have a tetanus/diphtheria booster in the past 10 years and a tuberculosis screening in the past 12 months. The tuberculosis screening is required if the student has lived outside of the United States in the past 12 months. *All immunization records are kept in your file in the Admissions Office.*
